

**Visitor in the Capitol**

**Tuesday, May 12th**, I authored HCR 211. This Concurrent Resolution recognized Blackland Research and Extension Center on their centennial anniversary. For 100 years, the scientists at Blackland Research have worked to ensure a safe and affordable food supply, protect the environment, and invigorate the economy. A group from the center in Temple was able to meet me upon the floor of the House while I presented this resolution. Blackland Research is a great entity to District 55 and the State of Texas, and I was proud to honor them in the House.
