WORKSHOP
RSVP
NOW

The Community Health and Resources Management (CHARM) platform is an interactive and collaborative mapping tool. It helps communities see how planning decisions made today impact tomorrow's communities.

WHAT
IS
CHARM

CHARM is about 'Growth in all the right Places'.
How many homes are we putting in harms' way?
Are we building resilient communities?

GROWTH
IN ALL THE
RIGHT
PLACES

This is a Texas A&M program that uses a low-cost, interactive table-top interface so people can build their own towns and cities using local data about floods, habitat, critical facilities, and more. It allows over a dozen development styles.

INTERACTIVE
PLANNING

If you have questions, please contact :

Walter Peacock | wmpeacock@tamu.edu | (979) 450-2183
