

Set up an LDAP Address Book

Basic Instructions to setup LDAP:

<http://office.microsoft.com/en-us/outlook-help/configure-the-address-book-for-ldap-HA010210161.aspx>

GroupWise Address Book

Server name: agmail2.tamu.edu

Display Name: GroupWise LDAP

Connection Details - 389

Search Base - Select Custom and type: AgProgram

Note: Only **NAME** and **EMAIL ADDRESS** are visible via GW LDAP.

Note: Using the GroupWise LDAP requires using the **Advanced Find** option. Select the **Last Name** field and type in the required information. Press **OK**.

TAMU Address Book

Server name: operator.tamu.edu

Display Name: TAMU LDAP

Search Base/Custom: ou=People,dc=tamu,dc=edu

Port: 389

Note: The TAMU LDAP does not require using **Advanced Find** option.
