

Favorite Apps	
	<p><b>DTN/The Progressive Farmer: Ag News</b>— coverage on a broad range of topics including breaking industry news, markets, crops, livestock, equipment, farm business, land management, ag policy, and farm life. Market data — Detailed market data allows you to effectively track futures and stocks through our state-of-the-art, multi-redundant ticker plants and quote servers. Interactive charts — Link charts to market data for a single, seamless view of how the latest prices correlate with current market trends. Drag your finger across the chart to see trends in market data.</p>
	<p><b>Field Records</b> record and maintain pesticide applications, link to specific field locations using satellite mapping, and keep other important crop production information with the Pesticide and Field Records app. Use the convenient product search option to quickly identify Environmental Protection Agency (EPA) product registration numbers and restricted use products.</p>
	<p><b>WeatherBug</b> has new real-time enhanced pin-point forecasts for 2.6 Million Locations Worldwide – The industry’s most accurate current, extended and hourly weather forecasts for your neighborhood and beyond. With 25% more accurate forecasts for the next 24 hours.</p>
	<p><b>Intellicast HD</b> raises the bar for interactive real-time weather applications. Whether you’re checking the forecast or tracking SEVERE storms, Intellicast HD is the only iPad weather app you need. Stunning visualization of wind motion using state-of-the-art particle animation and computer modeling.</p>
	<p><b>SpraySelect.</b> By TeeJet Technologies, this App allows you to quickly and easily choose the proper tip or nozzle for your application. Just enter speed, spacing and your target rate, Select your drop size category and you have a list of tips that will work for your application. The right nozzle is just a few seconds away.</p>
	<p><b>Calibrate</b> this app was created to aid in the proper calibration of spraying equipment. Simply select the type of sprayer you want to calibrate (Broadcast or Banded), insert values in each input box, select what you want the app to calculate (Volume/Area or Catch/Nozzle), and tap 'Calculate'. Each input's units can be customized by tapping the units.</p>
	<p>The Ag PhD <b>Fertilizer Removal by Crop</b> application is a great reference for you as you plan fertilizer applications on your farm. Simply select your crop and the desired yield for that crop, and you will be given the amount of vital crop nutrients that your desired yield will need. Results can be saved within the app and e-mailed to yourself or your agronomist for later reference.</p>
	<p><b>NutriAg</b> Ltd. offers an app for farmers, growers and dealers to reference product compatibilities.</p>
	<p><b>AGRIplot</b> allows you to plot any area on a map. Simply walk around your property and add a landmark point, or drag and drop pins anywhere on the map. AGRIplot will automatically calculate the area enclosed by the points and provide the distances between each point. Interest points allow you to identify additional features for your plot. You can even take pictures associated with each landmark or interest point for a visual representation.</p>

## Favorite Apps
