**Career Goals:**

Since the start of my Sophomore year in college, I have realized that I would love to spend my career in the dairy industry. I'm especially interested in the nutrition aspect of the dairy industry and I'm passionate and excited to start my career. Ever since I was a kid I have had a deep seeded love for animals and particularly the welfare of them. It has only been in college that I have realized that I am especially interested in cows. All in all, I'm very excited about my career and I think that I could bring youthful energy and knowledge to a position in the industry.

**School:** Texas A&M University  
**Major:** Animal Science  
**Expected Graduation date:** May 2015  
**Career Goals:** After completing undergraduate work, I plan to attend veterinary school specializing in large animals. As a veterinarian, I want to work with food animals such as dairy or beef cattle or poultry. I want to be most involved in reproduction of food animals. As we face a need to feed more people with less space, reproduction is going to be at the forefront of advancing production agriculture. Artificial insemination and embryo transfer technologies only become more economical for large producers each year. Ultimately I want to be the veterinarian for companies or producers that utilize such technologies and provide the assistance they need to improve their herds and profit lines.

**School:** Washington State University College of Veterinary Medicine  
**Major:** DVM  
**Expected Graduation date:** May 2015  
**Career Goals:** I am avidly interested in dairy production medicine and consulting. As a veterinarian, I will need tools to objectively evaluate each dairy to identify critical control points where management can positively impact cow comfort, nutrition, herd health, reproduction, and genetics in an economically and environmentally sound manner. I plan to take full advantage of the learning opportunities offered through the SGPDC-T program to help me understand and meet the needs of dairy clients and keep abreast of the latest ideas that are changing the dairy world. I would like to optimize cow health to minimize the use of antimicrobials and help dairymen regain public trust. This summer is an outstanding opportunity to network with my peers, industry leaders, future employers, and future clients to continually improve the dairy industry.
