

Lawn & Ornamental Structural Category Training

Lawn and ornamental pest control represent a very large portion of urban pesticide use. As urban areas continue to expand and homeowners continue to desire attractive lawns and landscapes, the use of pesticides to control plant pests has continue to grow. The use of pesticides to control insects and diseases in home and other landscapes is a serious business, one that requires a wide knowledge of the pest as well as some understanding of pesticides and their proper use. This 8 hour course is designed to satisfy the SPCS Apprentice Training Requirements as specified in **Rule 7.132 (i) (2)** "8 hours of classroom training in each category in which the apprentice is to provide pest control services".

The \$150 Lawn and Ornamental - Landscape Maintenance course includes manual (**AES-5066**), a \$35 value, and online instructions are included. This course can also be taken by other SPCS applicators to increase their knowledge in the subject area.
