

CAMP BULLIS REGIONAL CONSERVATION PARTNERSHIP PROGRAM

LAND MANAGEMENT FUNDING

Funding for landowners is available through the Camp Bullis Regional Conservation Partnership Program (RCPP) for land management practices that help reach your land stewardship goals. Conservation work in this region also supports the mission and training capabilities of Joint Base San Antonio - Camp Bullis and the goals of the Camp Bullis Sentinel Landscape Partnership.

\$4 million in funding is available for conservation activities that include improving riparian areas, water quality, native plant communities, soil health, rangelands, and wildlife habitat.

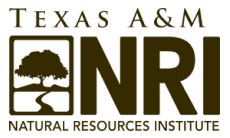

WHO CAN APPLY? Landowners within the project area who are interested in conservation work on their property are encouraged to apply. Priority will be based on proximity to Camp Bullis and critical ecological elements like waterways and karst features.

APPLY

**ACCEPTING APPLICATIONS
YEAR-ROUND IN 2025**

ELIGIBLE LAND MANAGEMENT PRACTICES INCLUDE

- Riparian Forest Buffer
- Riparian Herbaceous Cover
- Tree-Shrub Establishment
- Brush Management
- Prescribed Grazing
- Range Planting
- Conservation Cover
- Upland Wildlife Habitat
- Early Successional Habitat

REGIONAL CONSERVATION PARTNERSHIP PROGRAM

A Regional Conservation Partnership Program (RCPP) is a partner-driven approach to conservation that funds solutions to natural resource challenges on working land. By leveraging collective resources and collaborating on common goals, RCPP demonstrates the power of public-private partnerships in delivering results for agriculture and conservation.

The Camp Bullis RCPP is supported by USDA’s Natural Resources Conservation Service (NRCS) and led by Texas A&M Natural Resources Institute.

TEXAS A&M NATURAL RESOURCES INSTITUTE

The Texas A&M Natural Resources Institute focuses on enhancing conservation, natural resource management, and private land stewardship through interdisciplinary applied research, education, and policy. We are committed to solving natural resource issues and engaging land managers, citizens, and policymakers throughout the process. We are where conservation and applied research meet.
