

Computers

Jacob is a professional photographer and videographer and needs a new computer. He is looking for one that he can use for his job as well as perform word processing features. He will also be handling money a lot when selling his services as a photographer and videographer so a good money program like Quicken or QuickBooks would be a great extra as well as programs to help him edit videos and photos. He also makes a lot of wedding videos and loves to make them into Blue-Rays so everyone can see them in a high resolution/high definition setting. He does have a budget of \$4,000 and would like to buy an external hard drive for all of his pictures with his left over money. Help him find the best option for his new computer.

Dell recommends Windows® 7.
