

Class #3 –Digital Media Players

Katherine is a jogger and would like to have a media player she can use while running. She would like it to play songs and possibly even count her steps. She also wants it to light up because she runs at night sometimes and wants it to clip on to her pants or be an armband so it is hands free. She also wants to have at least 8GB of memory on her player. She has \$300 to spend. Please help her find the best Digital Media Player.
