

Jeans Scenario

Jenna is looking to buy a pair of jeans for her niece Kelly, who is 17. Jenna does not want to spend more than \$130.00 on a pair of jeans. Jenna would like the pair of jeans to be as close to 100% cotton so they are a better fit for Kelly. Kelly also likes jeans that are low rise because they fit her body type better. Kelly prefers darker jeans but fit is more important than color. Please help Jenna find the perfect pair of jeans for Kelly.

#1

Lil Maggie Jeans
Short, Regular, Long, X-Long

CARE: Machine Wash Cold.

Placing & Reasons for Jeans

Placing: 4 – 1 – 2 – 3

#4 – I placed 4 first because 4 is 100% cotton, it is the least expensive of all the products at \$79.50, it has a super low rise and Kelly likes a low rise, and the jeans were not a light color.

#1 – I placed 1 second because although they were a light pair of jeans which Kelly does not like, 1 was 98% cotton with 2% spandex which Jenna wanted because it would fit Kelly better. I chose the fitting of the jeans over the preference of the color because Kelly prefers fit over color. 1 also was a super low rise and was \$119.00.

#2 – I place 2 third because granted 2 was a darker pair of jeans, I criticize that the jeans were made of 75.5% cotton, 23% polyester, and 1.5% elastic, which would not fit Kelly as well as the 98% cotton like 1. 2 was also \$99.00 and low rise jeans.

#3 – I place 3 last because 3 was made up of 75.8% cotton, 22.7% polyester, and 1.5% lycra. 3 was also the most expensive at \$129.00 and out of Jenna's budget.

#4
