2018 Junior Ag Mechanics - WORKSHEET

COUNTY 4H / FFA CHAPTER :	COUNTY:
CEA / AST :	
Please completely fill out one Ag Mechanics Entry Form per project that will be exhibited by the club/chapter	

Project to Be Entered in Class Number (See Premium List):	
Description of Project :	
	Serial Number (if applicable):

Please fill out the information below for each student exhibiting the project listed above.

1.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
2.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
3.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
4.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
5.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
6.) First :	MI:	Last:	Address:
Soc. Sec.:		Birthdate:	
ENTRY FEE = $40 / project entered			

NOT OFFICIAL ENTRY FORM

This WORKSHEET is to assist AST/CEA gather entry information from Exhibitors.
AST/CEA will enter Exhibitors via Online Entry Process and print off COMPLETED JUNIOR SHOW ENTRY FORMS.
AST/CEA will mail in COMPLETED JUNIOR SHOW ENTRY FORMS + *AG MECHANICS RELEASE FORM.*

ENTRY DEADLINE: December 1, 2017

2018 Ag Mechanics Release Form

MAIL AG MECHANICS RELEASE FORM WITH ONLINE COMPLETED JUNIOR SHOW ENTRY FORM AND PAYMENT TO:

Tractor Unloading/Loading

- The San Antonio Stock Show & Rodeo assumes no responsibility for damage or accidents occurring during the driving, unloading and loading processes. It is imperative that the AST/CEA/driver are familiar with the equipment so the process can be performed in a safe and efficient manner. The person driving/unloading/loading the tractor on behalf of the club/chapter is to be designated by the AST/CEA. Show officials will expect the person performing these duties has been approved by the AST/CEA.
- The following is a list of procedures for tractor unloading/loading:

- The driver must be familiar with operating the tractor as well as the trailer it is loaded onto and have practiced loading/unloading prior to the show.
- The tractor should have an operating throttle (must throttle down to an idle), clutch, and brakes (both right and left are equal in pressure to engage).
- Show officials may check tractor operating controls, including brakes to determine if they function properly when locked together prior to allowing the tractor to be unloaded/loaded. Tractor must be able to start and be throttled to idle smoothly.
- Tires should be monitored; rear tire pressure should not exceed 10 psi. Prior to unloading/loading tires should not be treated with tire black, especially the tread. Exercise caution if unloading/loading in wet or windy conditions.
- Other projects/equipment should not be loaded on the rear of the trailer to prevent unloading or loading of the tractor. If a project is loaded on rear of the trailer, it must be pulled to the project offloading area near the barns to be unloaded, then the trailer will be pulled back in to the tractor unloading area. Fork lifts will not be brought to the trailer to unload or load projects in the tractor unloading/loading area.
- If the tractor is a tricycle type (one or a narrow front wheel(s)) then the trailer must be equipped with a middle ramp that is hinged to the trailer securely or ramp should extend across total width of the trailer.
- All ramps on trailer must be designed with proper traction; this is especially important in wet weather conditions.
- Trailers hauling crawler (track) type tractors must be equipped with suitable ramps.
- The driver will be given instructions by the show officials on where to unload/load the tractor. Area will be marked/designated.
- Show officials will perform a cursory check of the tires and operating controls after unloading.
- It is the responsibility of the driver to ensure that the area around the trailer and unloading area is clear and safe prior to unloading/loading.
- If show officials, at any time, are concerned with safety of unloading/loading, they may halt the process and direct the driver to an alternate site to wait until additional equipment can be used to augment the unloading process.

- No more than 10 gallons of fuel in the fuel tank
- Neat and functional drip pans (required only at night) containing floor absorbent material (cat litter) to collect any coolant, oil, or hydraulics that may drip from the tractor should be placed under tractor when tractor is not being judged. Drip pan should not be used during day when tractor is being judged.
- Fuel shut off valves, under all fuel tanks, must be functional and all tractors must be exhibited with these valves off. Fuel caps do not need to be taped.

I certify that the entry is eligible and agree to abide by the rules of the 2018 San Antonio Stock Show & Rodeo Livestock Premium List.
