

Beekeeping Basics

If you have an interest in beekeeping and/or learning how to start your own bee hives for pleasure, environmental stewardship or to enhance pollination, join us! This program is meant for first-time beekeepers or those with very limited experience and presented by experienced beekeepers and entomologists. Anyone can be a beekeeper—young or old, city or country dweller!

During this course, we will cover the basics of bees and beekeeping, including: bee biology, beekeeping equipment and tools, space and time requirements and beekeeping for tax exemption.

A hands-on field day to a beekeeper's yard will be held April 14 or 15—two options for you to choose. This is where you will learn the most about beekeeping! Must sign a medical release waiver to participate. Bee suit provided.

Cost: \$65
