

Water Well Screening Event

TEXAS WELL OWNER NETWORK

RESOURCES HELP LANDOWNERS PROTECT GROUNDWATER

The “Well Informed” TWON program is an educational program that gives well owners the opportunity to have their well water samples screened for common contaminants including total coliform, *E. coli*, nitrates and TDS salinity. The screening of the water samples is followed by a 1-hour explanation of the results the next day, water well protection practices and focuses on wellhead protection and recommendations for remediating well contamination.

Well Informed Screening - July 12 & 13

**Bexar County AgriLife Extension Office, 3355 Cherry Ridge Street,
