

Stormwater Workgroup

Meeting Notes

2/15/11

Attendees

Dustin Roberts (Galveston County Health District), Susie Blake (League City), Brian Craig (League City), Sean Rosenberry (Calumet Specialty), Jack Murphy (League City), Marc Reid (Texas Coastal Watershed Program), Charriss York (Texas Coastal Watershed Program)

Discussion

The group discussed the potential role stormwater plays in moving bacteria and providing monitoring points for problems that are identified in drains and ditches. The workgroup decided that a specific workgroup for stormwater was not needed and felt that the issues, related to stormwater, could be better addressed in the other area specific workgroups.

Representatives from League City and Galveston County discussed their MS4 Permits and what they do to manage them. They also mentioned that staffing constraints were a concern.

Action Item

- Address stormwater issues in each workgroup. (On-Site Sewage Facilities, Wastewater Treatment Facilities and Agriculture)
