

Animal Sources Workgroup

Meeting Notes

March 8, 2011

Work Group Members Present

Brian Koch (TSSWCB), Phoenix Rogers (Texas AgriLife Extension Service), Dustin Roberts (GCHD), Linda Broach (TCEQ), Charriss York (TCWP), Derek York (TPWD), Marc Reid (TCWP)

Discussion

Following a brief recap of the last workgroup meeting, the group was provided with 9 elements tables from Bastrop Bayou and Gilleland Creek Watershed Protection Plans. The group worked on the following identified sources of bacteria:

- Bacteria deposited in the watershed by:
 - Agricultural Operations - livestock, poultry, horses, ponies
 - Domestic Animals - dogs, cats, etc.
 - Exotic Animals - Feral hogs, exotic ducks, wildlife park, etc.

The workgroup compared components of each example 9 elements table and discussed how the components could be applied to the Dickinson Bayou Watershed.

Action Items

- Marc will work on filling in the 9 elements table as discussed.
- Linda will talk to Michelle (TCEQ) about stormwater relating to animal sources.
