

INTERESTED IN CONSERVATION, ENVIRONMENTAL POLICY, AND DEVELOPMENT?

Apply to be a 2016-2017 ABS Conservation Scholars
Undergraduate Intern!

The Applied Biodiversity Sciences Conservation Scholars Program is looking for undergraduate interns to research local issues related to the Gulf of Mexico ecosystems and energy development! This research explores broad questions of the relationship between energy development, energy policy and natural resources in the Gulf of Mexico.

Each intern will receive a small research stipend to conduct baseline research and associated travel related to a proposed summer internship opportunity, available over the Fall and Spring semesters. The student will then spend one month working in a state or federal agency, NGO, or industry, **fully funded by the program**, to gain hands-on experience on issues related to natural resource management and energy development.

Applications are due **Friday October 7, 2016**. Please see our website or email us at absconservationscholars@gmail.com for details!
All TAMU undergraduates are invited to apply.
